```

【Objective】

- To establish the “DX pig farm” business in Ukraine where pigs are raised with minimal human intervention.
- To accelerate the company’s expansion into the European market.
- To contribute to the recovery and growth of Ukraine’s pig farming industry.

【Project implementation contents and methods】

- Feasibility Study: Verify the effectiveness and feasibility of DX pig farms in Ukraine. Conduct a business feasibility study, secure pig farms and partners for demonstration, formulate a demonstration plan, and design the Ukrainian version of the DX pig farm.
- Demonstration Project: Implement and demonstrate the Ukraine-version DX pig farm and prepare for future business development.

【Main technologies/services】

- “DX pig farm” where pigs are raised with minimal human intervention.

【Schedule】

- Planned duration: 3 years from grant approval

Contribution to Ukrainian Reconstruction	<ul style="list-style-type: none">• Recovery of Ukraine’s pig industry from war damage (reconstruction and capacity enhancement of livestock facilities)• Stabilization of domestic supply in Ukraine through increased pork production• Strengthening Ukraine’s international competitiveness through expanded pork exports• Job creation and income growth
